# Unattended Payment Terminal
## i9500 Card Reader and PINpad

## Overview

DPS is the global leader in card acceptance systems for unattended cashless devices with over 30,000 machines connected to its network. DPS delivers a comprehensive end to end solution "Payment Express"which provides merchants with a Chip & PIN, PCI compliant device, covering everything from hardware, software, switching, reconciliation tools and device management. Payment Express is integrated with all leading manufacturers of vending, parking, fuel and OPT equipment.

Utilising DPS' proven card acceptance platform, including EMV kernel, the Ingenico UPT and Payment Express combine to provide an unbeatable unattended solution for Chip and PIN environments.
