

PAYMENT EXPRESS

Payment Express offers significant cost savings and value adding features that no other device can. In addition, it exceeds all global security standards and future proofs against any new mandates.

With over 10 years experience providing integrated EFTPOS and payment solutions to the largest and most complex customers globally, DPS is the logical choice when looking for a payment partner.

DPS guarantees a lower cost solution overall with many additional benefits and features.

KEY POINTS:

- Fully integrated with all leading POS applications
- Pure IP solution – supports ADSL, VPN, GPRS, LAN, Thin Client and unattended environments
- USB plug and play. Also USB powered. No need for specialised technicians to go on site
- Average transaction time is .5 second
- Full support for Dynamic Currency conversion, gift, loyalty and other 3rd party applications
- No EAC, controller, leased lines or special modems.
- Use the point of sale printer for EFTPOS receipts
- Full support for Electronic Offline Voucher (EOV) – continue processing transactions if network or bank is down.
- EMV 6.0 certified
- On and offline chip / PIN, PCI PED, PCI DSS and 3DES compliant
- Choice of PINpads from world's leading manufactures
- Use the same solution in many global regions
- Create detailed reports of all EFTPOS transactions in real time via web based Payment Manager.
- All PINpads can be remotely monitored in real time via the Payment Manager
